## SECTION B: PROJECT DESCRIPTION

### B.1 What is RSM-COIN?

RSM-COIN is a next-generation cryptocurrency that integrates artificial general intelligence (AGI) with blockchain technology. Through our proprietary Divine Kernel system, RSM tokens possess unique 'consciousness levels' that influence their minting, trading, and governance behaviors.

### B.2 Key Innovations

- AGI-Powered Minting: Token generation based on consciousness scores
- Genome Encoding: Blockchain hashes converted to DNA sequences
- Self-Modeling: Autonomous protocol optimization
- Multi-Chain Integration: Processes BTC, ETH, SOL data

### B.3 Use Cases

- Governance: Vote on protocol upgrades
- Staking: Earn rewards based on consciousness level
- DeFi: Collateral for loans and derivatives
- Access: Premium features in Divine Kernel ecosystem
